***Patient Information  
Under 8 years old***

***A study about surgery for patients  
with Cerebral Palsy (CP)***

## Some Questions for You

Have you been to see some doctors and physios?

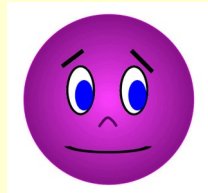

Did they check the way you move about?

Did they talk about having an operation to help you move better?

Sometimes this can be a bit scary!

But all the grown ups will help look after you!

## What's going on?

Because the doctors think surgery would help, we'd like to ask you to help us.

Would you like to help other children with Cerebral Palsy having surgery like you?

We're asking children with Cerebral Palsy from all over the UK to help us.

## OK! So what happens now?

We would just need permission from your grown up—and you can sign a form too if you like!

Then we'd ask you some questions—all about you!

Your answers will be put into a special and secret database.

Your answers will help us understand how the operations help patients like you!

Information about the assessments you have at the hospital will also be looked at in this study.

## Do I have to take part?

No! If you don't want to get involved, don't worry! You'll just have treatment as planned by you and your doctors and you won't have to answer any of our questions.

## Who's running this study?

Doctors, scientists and physiotherapists in Oxford are working on it.

A charity called Action Medical Research have given them some money to run the study. Action Medical Research give money to lots of people to help them improve treatments for children in the UK.
